'I do not know of any warrants having been obtained in England. They would be of no use, as the people have committed no crime in England or its dominions."

"If seems so. I am in hopes, however.

"It seems so. I am in hopes, however, that Mr. Cotterill may succeed in getting their property out West." he returned.

MR. ROPERTSON LOSES HIS TEMPER. Mr. Robertson was not as cool as usual this morning, and nearly lost his temper once. This was when the reporter showed him the clippings stating that Mr. Cotterill had been in trouble before, and that religious people had subscribed to send his wife home to England, which money she really used to go to her husband in Canada.

MRS. COTTERUL IS WITH HER HUSBAND. "All I know of their family relations is that they lived happily in Orange, N.J., since I have known them. Mrs. Cotterill is now with her husband in the West. "The rumors and stories that are current."

'I am in no trouble. I am only sorry that I have been connected with the affair. I am entirely innocent of any wrong-doing in the matter, and as soon as possible I will go back to England and tell my friends so.

'Another groundless lie is the story told by an engineer named Babbitt, who says that he was bired to attend our entire the story told to a strend our entire the story told to a strend our entire the says that the way is the says that the story told to a strend our entire the says that the says th

BOBERTSON DENIES BARRITT'S STORY. "I never met the man to my knowledge Assuredly, if he had ever seen me and told Assuredly, if he had ever seen me and told me, or breathed a suspicion that all was not right, I would have investigated it at once, "I was in England at the time he says he foreshadowed fraud. I believe fairly that Mr. Cotterill would have done the same as I

would have done."
"Did you ever hear of Babbitt at all?"
asked the reporter.
"The only time to my knowledge that I ever did was about two months ago, when a man came to me with two shares of stock and told me that they were given to him by his uncle, a man named Babbitt. Now, it stands to reason that Bab-bitt would not have done so if he had sus-pected anything wrong."

BABBITT'S ALLEGATIONS. Here the reporter showed him the following extract from an interview with Babbitt, received from St. Louis and printed this

Scandalous, scandalous," he ejaculated upon finishing it. "I can only say again that the fellow lies when he says he ever spoke to me about the matter.'

MR. BOBERTSON'S CHALLENGE. When the Treasurer has grown calm again he was asked why, in view of his total ignorance of the electric process, he should in England issue a challenge signing his own name, claiming that Friend's process for refining sugar was ahead of everything in the same line and could not be equalled, and con-cluding by offering a wager of £500 to any cluding by offering a wager of £500 to any who could prove him wrong.

To this he said he didn't know. Some friends told him to issue the challenge and

"Of course I felt perfectly sure that every-thing was all right, with Mr. Cotterill's cir-cular in my possession," he added. Furthermore, he declared that he had never attended a single demonstration of the great process held in the Brooklyn factory, his business being mainly to attend to the English customers. have crossed the ocean twenty times,"

Mr. Robertson's attention was next directed to the exclusive report in The World this morning of the interview with Mrs. H. M. Baillie, a Brooklyn dressmaker, who for eight months was a dressmaker in the Friend household. She tells a very interesting story of the early struggles of the Friends when they hyed at 237 East Sixtieth street.

WHAT DR. CROSBY SAYS.

"Do you think that President Cotterill had any suspicion that Friend was a fraud?"
I do not. I believe that he was perfectly honest in the belief that Friend was possessed of a wonderful secret.

"I believe I did."

When? "I don't remember just now-"

The doctor was rather reticent in talking and did not care to give his opinion of Friend, whom he treated during the illness that caused his death. He said, however, that there was no doubt of his death.

Frent List of Entries for the Coming Union Run Three Miles-A Good Thing for Harvard Athletics-Talk of Sullivan's Toronto Representatives.

It is feared by his friends that young Jockey harley Ossler will never fully recover from the effects of the injuries he sustained when he was thrown from the back of Prince Karl recently. The unfortunate jockey has suffered intense pain, and it will be several months before he will be able to go about with any degree of comfort. Ossler has many friends, and they are taking hold of his benefit in a way that will surely insure its success. The benefit will be held in Hudson Hall, Hoboken, Jan. 15, and should be pat-ronized liberally by the racing element, in this city particularly, and the lovers of sports generally. Ossler wisnes to express thanks to those who are working in his behalf.

The entries for the games of the Amateur Athletic Union, to be held in Madison Square Garden Jan. 19, close to-day with Otto Ruhl, Secretary of the N. Y. A. C., 104 West Fifty-fifth street. It is expected that the majority of the entries will be received to-day and that the list will surpass in numbers and the prominence of the athletes affything of its kind ever made out before. It will be several days before the entry list will be ready for publication, but the committee having publication, but the committee having charge of the meeting will meet on Wednes-day evening and complete as far as possible day evening and complete the arrangements.

Otto Ruhl, Secretary of the New York Athletic Club, was at the Club's beadquarters at Fifty-fifth street and Sixth avenue Saturday evening for the first time during the week. Mr. Ruhl has been confined to his rooms by llness. He stated that the entry list for the Union's games numbered over a hundred last week. This is an unusual number to be on hand before the closing day.

Jimmy Reagan, the middle weight's brother, and Danuy O'Brien will enter the Varuna Boat Club's boxing competitions, to be held Jan. 23.

T. P. Conneff, of the M. A. C., and A. B. George, of the Spartan Harriers. London, are matched to run a three-mile race at the N. four A.'s coming games. four A.'s coming games.

The pool-players of the N. Y. A. C. are planning to have a tournament in the club-nouse before leng.

The grounds of the Pastime Athletic Club, at Sixty-sixth street and East River, are being used by many athletes who are training for the Union's games Jan. 19. Nearly all the members of the Club will compete in the various contests.

The action of the Harvard authorities in giving up their stand against professionalism in the athletic ranks of its students, in any form, has been met with warm approval on the part of the athletes in the various colleges and clubs. The students will no longer be barred from receiving instruction from pro-fessional athletes and trainers, or from com-peting with professionals. The boating at Harvard is said to be booming, the carsmen rowing in barges on Charles River every day.

Reddy Gallacher, Cieveland's middle-weight pugilist, has taken to wrestling of late, and is said to be a clever man in this work, as he is with his fists.

At the Pelican Club, Boston, to-night, Paddy Duffy and Charley Gleason will fight ten rounds with gloves, and Frank Creedon, of Ireland, and Jack Smith, of Boston, will demonstrate their relative merits in eight rounds.

The American Athletic Club has decided to pay the entrance fees of all its men to the Union's games in the future. Several other clubs are expected to follow suit.

The Sylvan Harriers, of Morrisania, are going to indulge in runs twice a week; and if the men take hold of this practice in earnest and derive benefit therefrom the runs will be kept up all Winter.

W. H. Germaine, of the Sullivan party, said that at Toronto, to-day, he should do all he could to have James Gordon Bennett made stakeholder. Mr. Germsine has been of this mind for some time, although he reof this mind for some time, although he revealed himself last night for the first time. Messrs. Wakely and Johnson have no objections to Mr. Bennett and say they also would agree to either Capt. Conner, of the St. James Hotel; Ed. Stokes, of the Hoffman House, or James E. Kelly, of Kelly & Bliss, the bookmakers. Mr. Johnson said that so far as a referee is concerned he should object to having a referee chosen until the men are in the ring ready to fight. This question has been discussed by sporting men pretty freely of late, and some declare that such an action would allow the fight to fizzle in the end. Mr. Johnson takes the other view of it. He says that there are few men who would stand the strain upon them by occupying the position of referee for six menths before the fight. Mr. Wakely is of the same opinion, and both men think it far more judicious to choose the referee at the ringside.

> A Reporter Learns the Possible Peril of Patent Leathers. A reporter was coming uptown in an "L'

train the other evening when his attention was attracted to a young man who entered. He was tall and elegant, and his clothes were of the kind that go with a young man who has an income that allows him to give a great deal of thought to dress. His fine overcoat was trimmed at the collar, cuffs and lapels with astrachan; his dark-brown breeches, with a tine white stripe in them, were creased sharply, and perticely fitting mahogany colored kid gloves were trying to get as near the bones of his hands as possible All this was quite as it should be and at-tracted no more attention than any ordinarily good taste in dress might do.

good taste in dress might do.

But there was more.
On the young man's left foot was a dainty patent-leather shoe, with cloth "seas," On the right was a gorgeous Turkish slipper of crimson velvet, stiff with gold embroidery. Above it was a brown silk stocking, perfectly matching the breeches and the pull seaf of chocolate brocaded silk in which was stuck a beautiful moss-agate searf-pin.

The reporter hasn't a grain of useless curiosity in his nature, but his whole system is superheated with an agonized yearning for information on any subject, from a broken tack to the music of the suberes.
